

TOOLMAKER SOLUTIONS Brand Protection Program

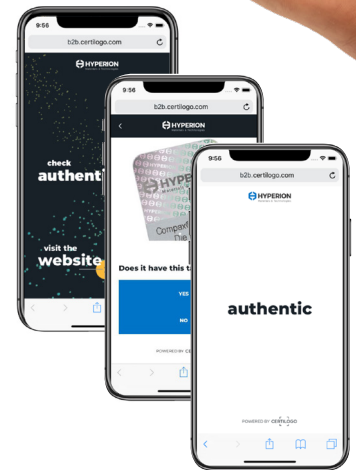

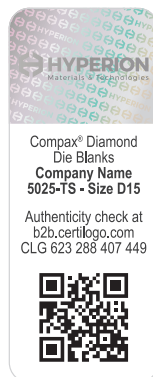

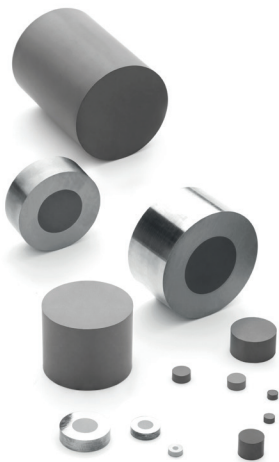

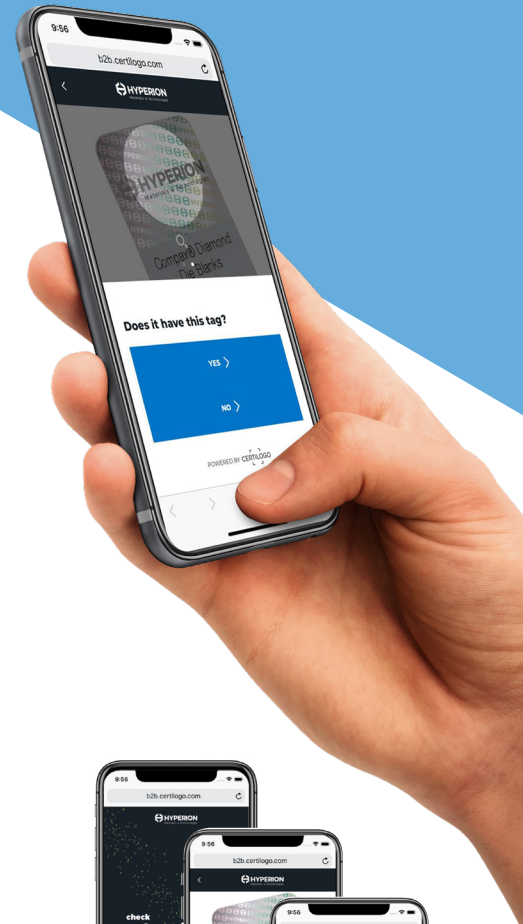

HYPERION COMPAX® Brand Protection Program

Hyperion Materials & Technologies manufactures the industry leading Compax® polycrystalline diamonds (PCD). Die blanks containing Compax® are recognized as premium products in the wire drawing industry because they provide very good abrasion resistance and the ability to achieve quality surface finishes. Hyperion is committed to preventing counterfeiting to ensure its customers receive genuine Compax®.

Make sure it is authentic Compax®

Now you can verify if the wire dies you received have real Compax® inside:

- Look for the genuine sticker with the Certilogo Code (CLG Code)
- Scan the QR Code or type the CLG Code into website
- Verify proof of authenticity.

Hyperion Materials & Technologies produces Compax® products

Hyperion generates a unique Certilogo Code in numeric and QR formats
Hyperion ships Compax® products with Certilogo stickers attached

Die maker receives Compax® products with Certilogo stickers
Die maker completes manufacturing of cased dies and ships them to end-user with Certilogo stickers

End-user scans the CLG Code to verify authenticity

TOOLMAKER SOLUTIONS Brand Protection Program

HYPERION COMPAX® Brand Protection Program and Certilogo

Certilogo is one of the world's leading authentication solutions:

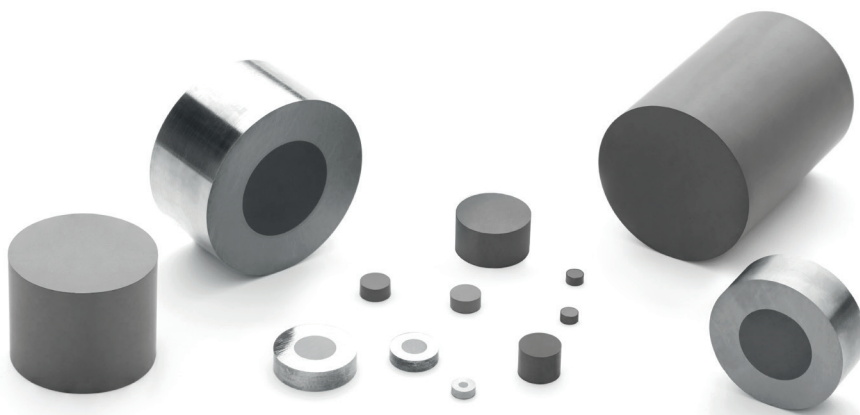

- Over 80 client brands in its brand protection network
- Used by over a million consumers from over 180 countries
- Enables brand protection managers to recover revenues more quickly and efficiently.

How it works

Hyperion Materials & Technologies provides our customer, a wire die maker, with a brand protection sticker that has a unique CLG number and a scannable QR Code with each product. This wire die maker will then ship these stickers along with the wire dies to wire producers. The wire producers can instantly check the authenticity of the product either by scanning the provided QR code or by logging into the Certilogo website b2b.certilogo.com.

With this program, wire manufacturers can be absolutely sure they are receiving dies with top quality Hyperion Compax® inside.

Compax® is a registered trademark of Hyperion Materials & Technologies, Inc. The Compax® brand is a major asset for both Hyperion and its customers.

All Compax® are polycrystalline diamond, but not all polycrystalline diamond products are Compax®
